<b>Cold</b>							

No Impacts

Minimal Impacts

Moderate Impacts

Severe Impacts

# **WEATHER KEY POINTS**

**04/03/22 - 04/09/22**

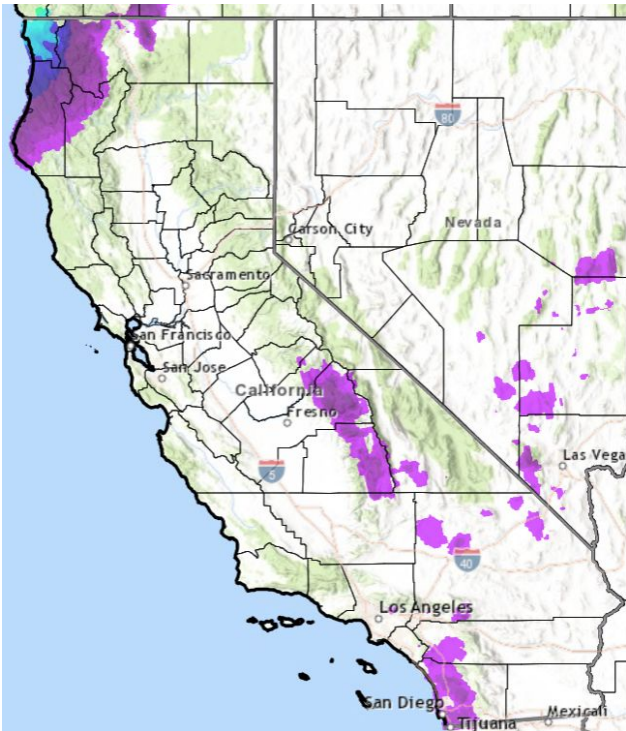

## **Sunday - Saturday**

- Very warm temperatures will continue across the state through the weekend and the entire work week, with generally minor heat impacts
  - The warmest temperatures are expected Thursday and Friday, with record-setting high temperatures for early April possible, especially across the Central Valley
- A storm will bring showers to far northern California Sunday night through Monday night; otherwise, dry weather will continue for the state through the next week
- Gusty winds will develop across the state Sunday through Tuesday, strongest in the mountains of Inland and Southern Regions
  - Gusts of 40-60 mph are possible across portions of southern California, including the Santa Barbara South Coast, the Antelope Valley, and the I-5 Corridor, which could damage trees and produce difficult driving conditions
    - Elevated to briefly critical fire weather conditions are possible in these areas
- Though winds will weaken for Wednesday through Friday, lingering gusty winds could allow elevated fire weather conditions to continue, especially in Los Angeles and Ventura counties
- Cooler and eventually wetter weather will likely develop next weekend into early next week

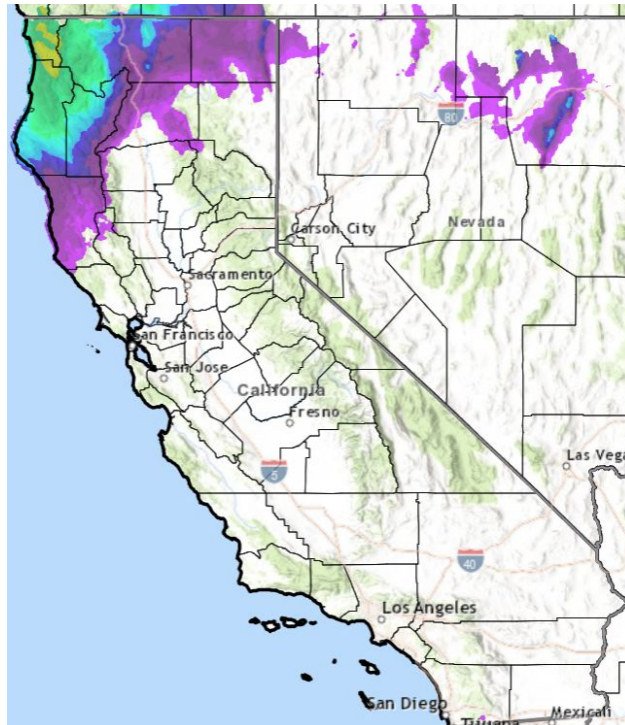

# PRECIPITATION FORECAST

04/03/22 - 04/05/22

**Sunday**

**Monday**

**Tuesday**

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

**Precipitation (inches)**

# **WEATHER OUTLOOK**

**04/08/22 - 04/16/22**

## **6-10 Day Outlook (April 8 - April 12)**

### **Temperatures**

- Below normal temperatures are slightly favored for northern California, with above normal temperatures slightly favored for southern California

### **Precipitation**

- Near normal precipitation is favored for the majority of the state

## **8-14 Day Outlook (April 10 – April 16)**

### **Temperatures**

- Below normal temperatures are favored to develop statewide

### **Precipitation**

- Above normal precipitation is slightly favored across northern and central California, with near normal precipitation favored for far southern California
